KEY WORKER STATUS

This letter evidences that the Hanover employee bearing it is required to commute as a key worker.

Hanover provides sheltered and very sheltered accommodation for older people, across Scotland. We support approximately 5000 residents, many of whom are vulnerable and often isolated from friends and family.

We provide care, including medication, personal care and support to our elderly residents. We are also responsible for cleaning and infection control of communal areas and essential safety checks. Many of our developments provide 24/7 care, as well as daily food services.

As such, our staff are defined as key / essential workers and are required to travel to and from work.

Please note the following extract from Scottish Government guidance regarding key workers:

"Category 2:

All other health and care workers, and wider public sector workers providing critical and emergency welfare services. This includes workers in the fire, police and prison services."

If you require any further details, please call us on 0800 111 4646.

Adam Curry

Director of Organisational Services
